

LGF_IsParityEven

Short description

The block checks whether the parity of the input variable of type DWORD is even. If the number of bits that are assigned "1" in the sequence is even, the return value is set to "TRUE".

Block

Input parameters

Parameters	Data type	Description
doubleWord	DWORD	Variable for which the parity is to be determined.

Output parameters

Parameters	Data type	Description
Ret_Val	BOOL	TRUE: When the number of bits that are assigned "1" is even
