

LGF_Impulse

Short description

This block generates pulses at a given frequency. The pulse is always present for one (control) cycle.

Block

Input parameters

Parameters	Data type	Description
frequency	REAL	Clock frequency in Hz

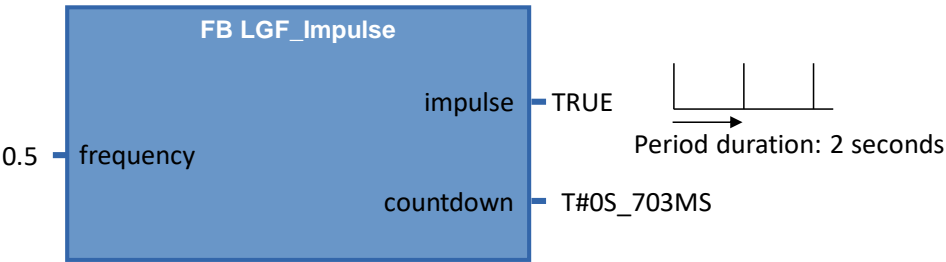

Output parameters

Parameters	Data type	Description
impulse	BOOL	Signal with pulses
countdown	TIME	Time until next pulse

Principle of operation

The block generates pulses at the output “impulse” with the frequency “frequency”. The block always begins with a pulse and sets the next pulse after the period that has elapsed.

Example

Note

New as of V1.2.0
The LGF_Impulse block (from V1.2.0) no longer calls the LGF_Frequency block.
